

I want to express my favor to the Do not call list in Indiana.

The do not call list in Indiana has reduced our disturbing calls durning family time to zero.

We enjoy having a phone for personal use, family emergencies and the internet.

We pay a premium for this service and feel that we do not need someone to use our phone to interupt are home time together. It is for our use and our friends calling. We do not want to be bothered but need our phone to be active to recieve calls that we do want. We should not have to have call screening to do this.

We really enjoy the peace that the Indiana Privacy law has provided to us.

We feel that it would not behoove the FCC to change what is a good law for the People of Indiana. The FCC should help other States adopt this legislation to ensure Privacy.

Thank you, Randy Wolf
